TABLE Intelligent Construction Technology (Suzhou) Co., Ltd.

We are formwork & scaffold technology company, by our more than 20 years experiences in this industry, we know what can meet the industry requirements.

The slab panel system, either work directly, or work with drop head system. It is good for regular height floor when working with independent props, also very good for high floors when working with different shoring system, such as the ring lock system, the Crab system, the Kwikstage system, etc.

Thanks for the high strength allow steel, we made the panels light weight, can compare with the aluminum panels which have the same capacity.

The Newest Technology

- The Q700 high strength alloy steel
- Light weight
- Long life
- Rustproof treatment
- Innovation in formwork industry
- Knockdown for shipping

The panels system for concrete slab

- The panels system for slab
- Either with drop head,
- Or without drop head
- Applied to Ring Lock, Kwikstage systems (300X)
- Applied to Crab shoring systems (500X)

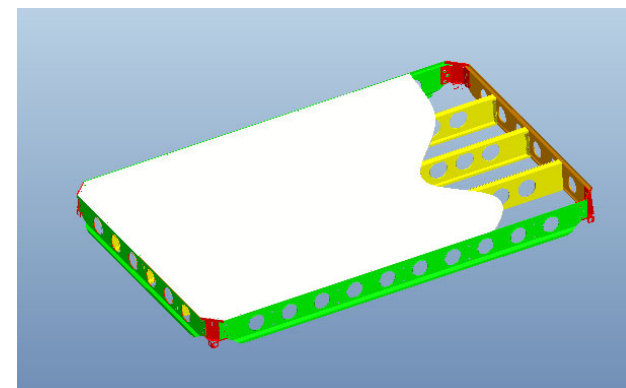

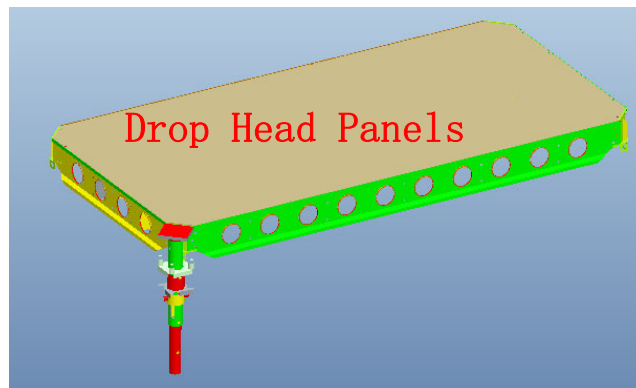

Slab Panels

Drop head System

500X

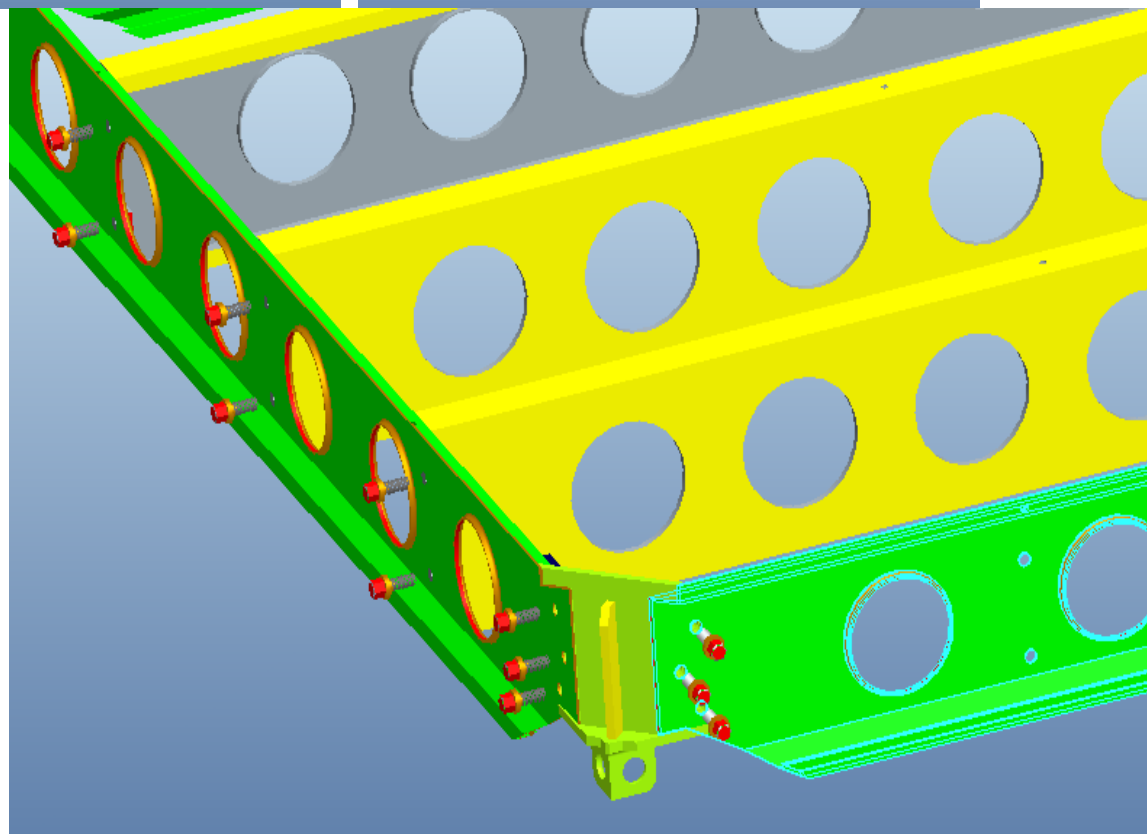

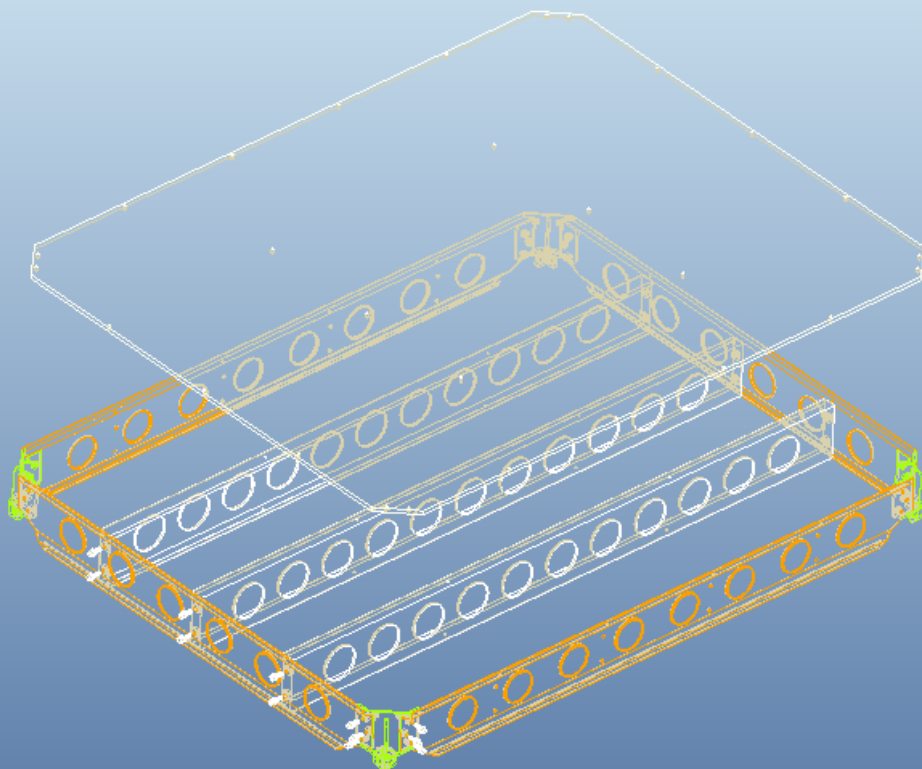

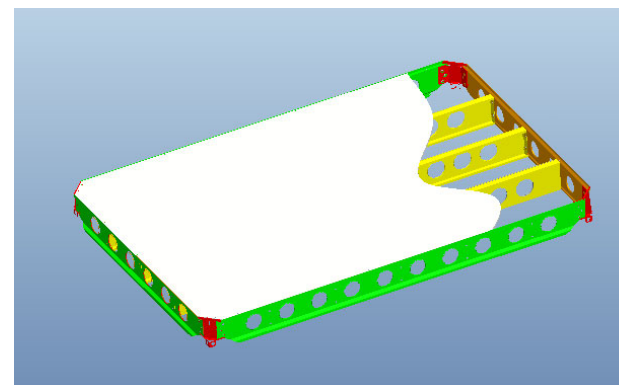

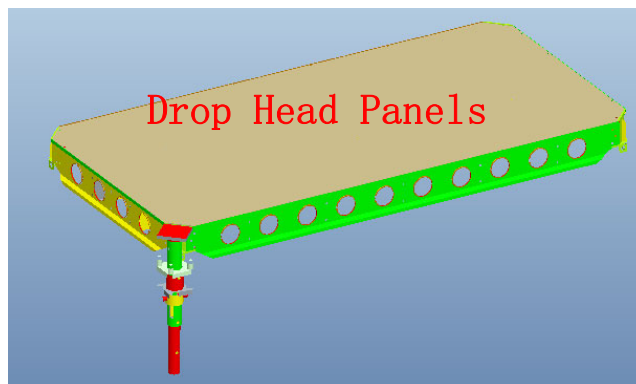

Model 型号	Size 规格尺寸(m)	Area 面积(m ²)	Weight 重量(kg)
DP 2015	2.0X1.5	3.0	57
DP 2010	2.0X1.0	2.0	36
DP 1515	1.5X1.5	2.25	37
DP 1510	1.5X1.0	1.5	28
DP 1010	1.0X1.0	1.0	21

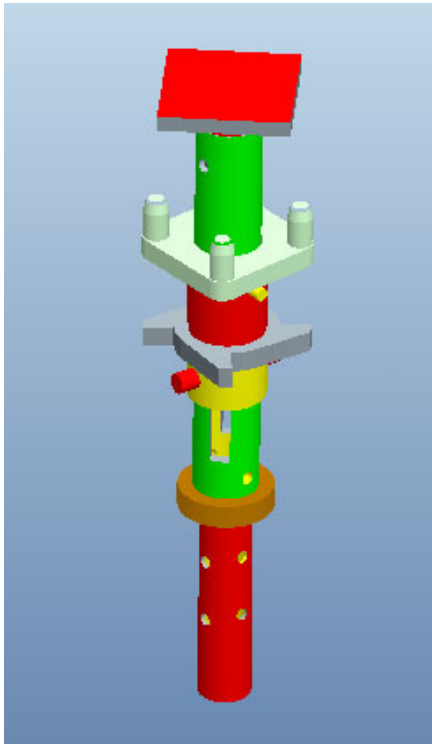

Panels are not made by welded frams

but made by knockdown pieces like IKEA furnitures

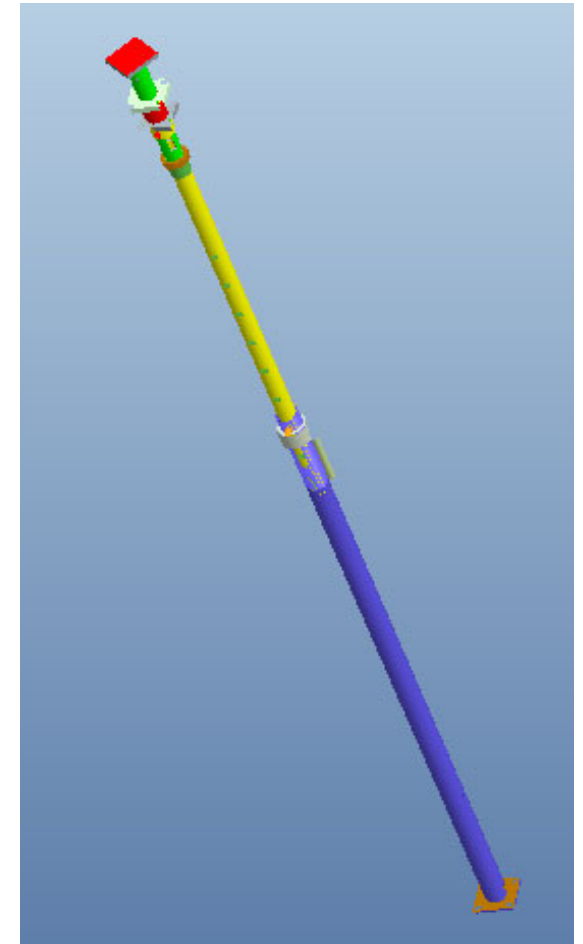

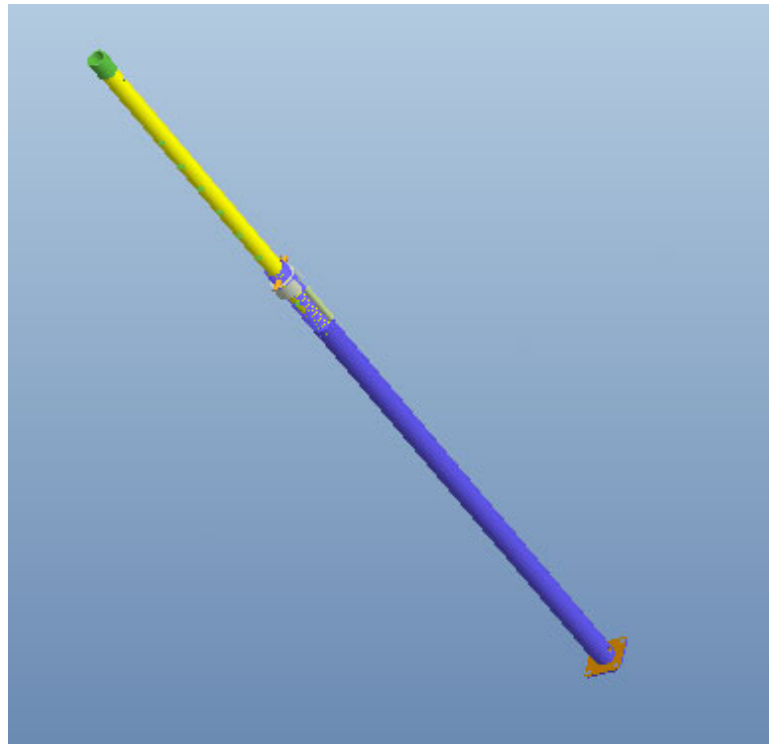

Easy shipping to anywhere

Drop head Inserted to Prop

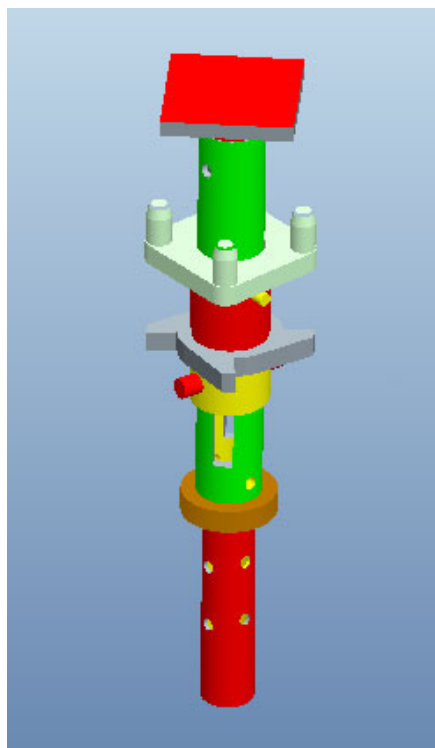

Weight: 6.5 Kg

Drop head Inserted to Shoring Verticals

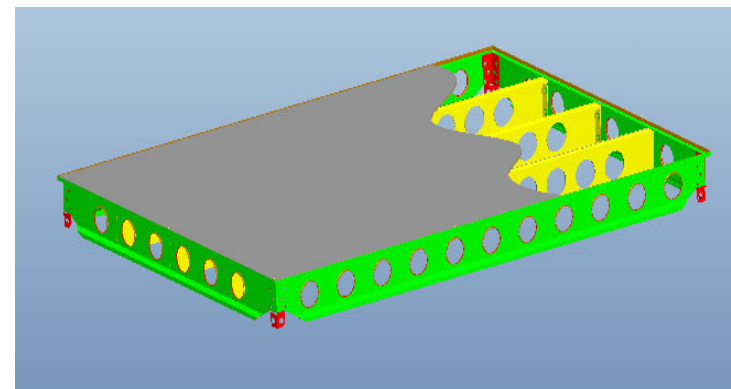

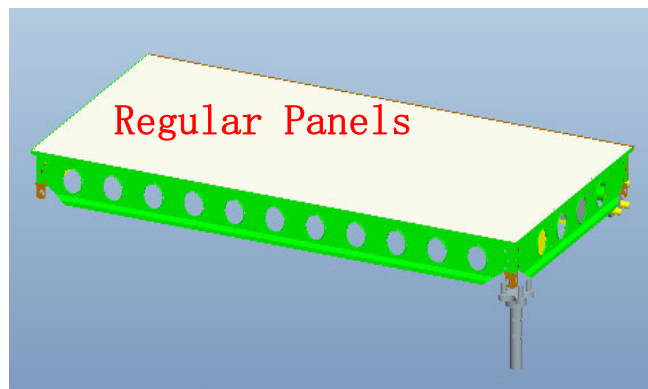

Weight: 6.5 Kg
